-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rinck et al (3,382,580), hereafter Rinck, in view of Messinger et al (5,185,933). Rinck discloses shaving foil apertures with different patterns in figures 1-5. Rinck does not teach shaving foil apertures with different shapes, however, Messinger teaches shaving foil apertures of different shapes as shown in figure 8. It would have been obvious to provide shaving foils of different shapes in Rinck as taught by Messinger in order to provide a more comfortable shave. Rinck and Messinger together teach shaving foils with different aperture shapes and various patterns. While the prior art does not teach specifics of a Penrose parquet pattern, the Penrose parquet pattern is not intended for shaving, but instead intended as a mathematical model for covering a surface with geometric shapes. If one wanted to use this design for a shaving foil it would have been an obvious matter of choice of a variant pattern, wherein any variant pattern would inherently provide cutting as much as applicant's design. For example, paisley patterns, Ammann-Beenker patterns, Escher patterns, etc. would be capable of cutting as well and perhaps to at least the same degree.
